

Dear Environmental Health Directors/Supervisors,

There has been an overwhelming response to the announcement of soils training classes. The April 26th-27th training hosted by Mid-Michigan District Health Department has reached the maximum registration number at this time. Two health departments have recently offered to host additional soil trainings to help fill the need. The soils training classes being offered now are:

EGLE Onsite Wastewater Program Soils Training

Dates	Day 1 Location	Day 2 Location
April 26 th -27 th , 2022 (Tuesday-Wednesday)	MMDHD-Montcalm Branch Office 615 N. State Road, Suite #1 Stanton, MI 48888	Kent County (Spencer Township)
May 18 th -19 th , 2022 (Wednesday-Thursday)	Van Buren Intermediate School District Conference Center 701 S. Paw Paw St. Lawrence, MI 49064	Van Buren County (Exact Location TBD)
June 1 st -2 nd , 2022 (Wednesday-Thursday)	Bay College 2001 N Lincoln Rd. Escanaba, MI 49829	Dickinson County (Iron Mountain Area)
October 4 th -5 th , 2022 (Tuesday-Wednesday)	Livingston County Health Department 2300 E Grand River Ave Howell, MI 48843	Livingston County (Exact Location TBD)

The day 1 classroom portion of the training provides presentations from the EGLE Onsite Wastewater Program staff. Additionally, we have many different samples of soils for Environmental Health Staff to identify and practice soil texturing classification. The day 2 field component will give your staff the opportunity for “real time” soil analysis with an overview of texturing native soils and verifying mottling and SHWT.

The capacity for participants is yet to be determined for the newest classes, but we will communicate as we know more. Please respond back with your interest and how many Environmental Health staff that need training via a MiEHDWIS OWM Training Request or an email to Dale Ladouceur. If you currently have staff registered for the April 26th-27th soils class and wish to change their registration to a different class, please inform Dale Ladouceur via email as soon as possible. Please continue to send any interest you may have in the April 26th-27th training, if you haven't already, as some spots may become available. Registration is not currently being taken for the Upper Peninsula soil training.

Thank you,

Dale R. Ladouceur
