CANNABIS IN PRACTICE

Virtual Webinar Series for Healthcare Providers

Our Speakers

Jodi Gilman, PhD | Wednesday, July 10 | [Register](#)
Medical and Non-Medical Cannabis Use: Potential Implications on Cognition and Clinical Outcomes

- Differentiate between various research methods used to study the effects of cannabis on various populations, including adolescents and adults with comorbid health conditions
- Analyze cannabis' neurological and cognitive impacts, focusing on differences in adolescents and adults with mental health disorders
- Explore how changes in cannabis policy influence neuroscientific research and the understanding of cannabis' effects on brain structure and function
- Discuss how neuroscientific findings on cannabis use inform clinical decisions and public health guidelines, emphasizing evidence-based recommendations

Ken Finn, MD | Thursday, July 11 | [Register](#)
Cannabis, Opioids, and Public Health Implications

- Understand the close relationship between opioids and cannabinoids systems
- Understand what conditions cannabinoids may possibly work for and how expanded cannabis programs impacted the opioid epidemic

Karen Osilla, PhD | Friday, July 12 | [Register](#)
Advances in Motivational Interviewing: Practical Strategies for Empowering People to Change

- Describe latest advances in Motivational Interviewing (MI) (4th Edition)
- Share three tips for successfully delivering MI drawing from the latest MI research on "what works"
- Describe ways to empower individuals to change

Roneet Lev, MD | Monday, July 15 | [Register](#)
It's Just Pot. What's the Problem?

- Recognize cannabis related medical conditions
- Learn to check for drug interactions with cannabis products
- Encourage including cannabis in ICD-10 diagnosis

Kelly Young-Wolff, PhD, MPH | Tuesday, July 16 | [Register](#)
Cannabis Use During Pregnancy: Research from Policy to Practice

- Understand trends in prenatal cannabis use
- Identify reasons why pregnant individuals use cannabis
- Describe the potential health risks of prenatal cannabis use
- Recognize strategies for talking with pregnant patients about their cannabis use

Leslie Lundahl, PhD | Friday, July 19 | [Register](#)
Adolescent Cannabis Use

- Describe current trends in adolescent cannabis use
- List new cannabis formulations and routes of administration
- Define effects and potential risks of cannabis use
- Discuss screening and intervention for adolescent cannabis users
