

Quarterly Billing Forum Agenda

March 12, 2026

2:00-3:00

1. Are billers still having to add the modifier 59 to their claims when billing the 90471 & 90480 together?
2. Is everyone moved over to the updated billing screen now?
3. Are there still ongoing issues with the updated billing screen?
4. Is everyone getting paid for the new prefilled Shingrix vaccine?
5. CHW billing. How many counties are doing it and are you getting paid for your visits? Are you billing out of Patagonia for this?
6. Is anyone billing out 340B meds for their STI clinic? How does that work when you are billing out to the private pay plans.
7. Universal Purchase Program for Immunizations.
8. Any additional items.
9. Next billers call will be on June 11, 2026. This will also be a hybrid meeting. We are once again partnering with the admin and the guidebook team for a full day of meetings and education.
10. 2026 Public Health Administrators and Billing Conference is on September 9, 2026. We know it falls the week of Labor Day, but that was the only date we could take for that month. There was one date for October, but our funding is only good until the end of September.
11. Thank you all for taking the survey for the fall conference!
