

# 2023 Equity in Action (EIA) Series at MPHI

[The EIA Series at MPHI](https://bit.ly/3XQSb1f) (URL: <https://bit.ly/3XQSb1f>) aims to equip professionals with the knowledge and skills to move equity from an intellectual concept to everyday practice. Facilitated by subject matter experts, the workshops include discussions, exercises, and resources designed to engage and inspire attendees to co-create lasting change. Policies and practices should seek out what is unjust and remove barriers to achieving health and well-being for everyone. The workshops are active and engaging, and strive to put that belief into action!
