Join us for this virtual seminar
Thursday, March 10, 2022, 8:30 am - 12 Noon

Workshop/presentation Objectives To help participants:

- Better understand the work of inclusion and diversity
- Understand how the brain's natural functioning can lead to unintended consequences and prevent us from leveraging human differences
- Better grasp unconscious bias and how it operates and effects individuals and organizations
- Better understand the root of cause(s) of inclusion and diversity-related problems
- Obtain concepts, terms and language that invite people into more positive and productive conversations about inclusion and diversity
- Develop a practice strategy to acquire necessary and fundamental skills
