

Greetings!

We are excited to announce that the Healthcare-Associated Infections (HAI) Section at the Michigan Department of Health & Human Services (MDHHS) will be hosting **in-person trainings** for local health departments this summer. These trainings will provide local public health professionals with valuable knowledge and skills to strengthen their capacity to **prevent and respond to healthcare-associated infections (HAIs)** in their jurisdiction.

Upcoming Trainings

Infection prevention and HAI training will be offered three times. The same content will be presented at each session. Training will take place from 10am-3pm:

- July 23, 2025 – Newberry, MI (LMAS District Health Department)
- August 13, 2025 – Battle Creek, MI (Calhoun County Health Department)
- September 4, 2025 – Howell, MI (Livingston County Health Department)

Workshop Overview

These trainings will cover key infection prevention and HAI topics, including:

- The Michigan Healthcare-Associated Infections/Antimicrobial Resistance Program
- Antimicrobial Stewardship
- Case Investigations for Multidrug-Resistant Organisms including Carbapenemase-Producing Organisms (CPOs) and *Candida auris*
- Infection Prevention Resources for Local Health Departments

Target Audience

Local public health staff who assist and/or oversee with HAI prevention and response. Please forward this email to any relevant staff within your department who may benefit from this training.

Registration

There is no cost to register. Please note that space is limited, and registration will close when capacity is met. Register via the link or QR code below.
