Series Objectives:

Participants of the From Research to Practice CME program series will:

Engage in interactive discussions with experts about current epidemiological and psychosocial issues impacting the prevention, diagnosis, and management of HIV and associated syndemic conditions such as viral hepatitis and sexually transmitted infections

Examine evidence-based disease management and prevention options for HIV and its co-occurring conditions

Understand how to access resources available through the U.S. Department of Health and Human Services, Michigan Department of Health and Human Services (MDHHS), and Wayne State University School of Medicine that support and enhance prevention and treatment efforts within the HIV syndemic across urban, rural, and under-served regions throughout the state.
