

Dear Peer-to-Peer Network members and partners,

Our team at the CDC Foundation and CDC Special Populations Unit is excited to share the [Public Health and Homelessness Toolkit](#), in cooperation with the Minnesota Department of Health, Public Health Seattle & King County and San Francisco Department of Public Health, as well as many other wonderful contributors. The toolkit provides strategies, best practices and other resources to assist health departments serving people experiencing homelessness. It includes sections dedicated to building and strengthening partnerships, engaging people with lived experience, ensuring equity, prioritizing infectious diseases and data modernization.

The toolkit is available online at the link above. We are also printing a limited number of paper copies on a first-come-first-served basis. If you are interested in receiving a hard copy of the toolkit, please fill out this [interest form](#). You are welcome to share these links with colleagues at your agency or other organizations.

Feel free to reach out to me at mbien@cdcfoundation.org if you have any questions. Thank you to everyone who contributed to the toolkit and thank you for all the challenging and impactful work you do for your community every day.

Michael
