

Hello Health Officers,

The Michigan Department of Health and Human Services is continuing to provide free qualitative fit testing apparatus kits and Michigan Occupational Safety and Health Administration (MIOSHA) training resources to ensure respiratory protection standards are met throughout the State. Qualifying facilities include **skilled nursing facilities, adult foster care, homes for the aged, and assisted living.**

To request these free respiratory fit testing kits for your facility, we ask that the facility's Infection Preventionist (or other designated facility employee) complete the [linked order form](#). The survey form can also be reached at this web address:

https://www.surveymonkey.com/r/MDHHS_RespiratoryFitKit_OrderForm.

Respiratory fit testing kit orders will be placed at the end of each month. After you complete and submit the order form, kits will be shipped using the information you provided. Following the shipment of your respiratory fit testing kits, you will be contacted by MDHHS with training resources provided by MIOSHA that will assist in developing a respiratory protection program. Contact information for MIOSHA Consultative Assistance services will also be provided in the email, if you require further assistance in training staff on the use of the respiratory fit testing kits.

If you have any questions about this program or run into any issues with the form, please contact me at wirthk4@michigan.gov.

Thanks,

Kenneth Wirth, LLMSW-Macro (he/him/his)
