

Michigan Environmental Health and Drinking Water Information System (MiEHDWIS)

The EGLE Onsite Wastewater Program began using the Michigan Environmental Health and Drinking Water Information System (MiEHDWIS) on July 22, 2021. This new system serves as a means for local health departments (LHD's) to submit Onsite Wastewater Management (OWM) Requests and/or OWM Training Requests to EGLE. Training tools are being developed for reference by LHD users while drafting requests, uploading files, and after submission of information.

Persons seeking wastewater permits, plan review, project or development review, field work, or other LHD services must communicate directly with the applicable local health department.

WHAT CAN YOU DO NOW?

- ✓ **CREATE A MILOGIN FOR THIRD PARTY ACCOUNT & REQUEST ACCESS TO MiEHDWIS**
If you don't already have a [MiLogin for Third Party Account](#), please create one. MiLogin Account holders can then [Request Access to MiEHDWIS](#). When prompted to provide a Reason for Access, identify yourself as a staff member from (name of health department) who is seeking access to OWM, provide the county(ies) you work in, and your LHD role (Environmental Health Specialist/Sanitarian, Supervisor, Director, or other LHD title).
- ✓ **SUBMIT REQUESTS & UPLOAD FILES**
Submit requests and associated information for assistance with site specific reviews for the applicable county.
- ✓ **SUBMIT REQUESTS FOR LHD TRAINING**
Identify interest for LHD training(s) and provide requested topic(s), timing, and method.
