

The Region V PHTC wants to hear from YOU! What are the training needs of your health department staff?

NAME OF PARTNER ORGANIZATION is interested in supporting the workforce development and capacity-building needs of our state's local health departments. Our partners at the [Region V Public Health Training Center](#) are conducting a training needs assessment to inform this work.

You should have received a unique survey link from them in an email with the subject line *"Request to Participate in Regional Public Health Training Needs Assessment."* The email would have come from the Region V Public Health Training Center at rvphtc-tna@umich.edu. **We encourage you to respond to this request by October 27.** The survey is intended for health officials or their designee. If you didn't get an email from them, let us know and we will connect you with the Region V PHTC directly.

Your response to their survey will inform the training resources they develop, and findings will be shared with us in the aggregate to also support the activities we offer as well.

Thank you for your assistance with this important work!
