Tab B (Self-Monitoring 14-Day Check Sheet) to Appendix 3 to OPORD 20-004

COVID-19 Self-Monitoring Check Sheet

* Upon initial screening at/before the start of orders, if a Soldier has a fever >100.4 Degrees Fahrenheit and/or symptoms of the common cold to include cough and shortness of breath, it is recommended that the Soldier return home or stay in place in his/her room in order to self monitor for 14 days to ensure he/she does not contribute to possible spread of COVID-19. While self-monitoring in a quarantine and/or situation, it is recommended that the Soldier stay in place at home or in his/her room, avoid others, and call a health care provider for further medical advice if symptoms get worse.
